Experience summary

- **HTML/CSS:** 10+ years
- **Javascript:** 10+ years
- **Tyepescript:** 8 years
- **Vue:** 4 years
- **Nuxt** 2 years
- **React:** 4 years
- **NextJS:** 2 years
- **React Native:** 1 year
- **Angular:** 4 years
- **AWS:** 2 years
- **PHP:** 6 years
- **Laravel:** 2 years
- **Strapi**: 2 years

Employment History

2023-02 – 2025-03	**CONDA Crowdinvesting**
	Role: Senior Frontend Developer
	Stack: Vue 3, Nuxt, React, NextJS, WordPress, Tailwind CSS, Strapi, GraphQL (Apollo), Keycloak, PHP, Laravel
	Achievements:
	I helped the Conda team finish the administration panel built with Vue 3, working under time pressure. I refactored old code and took technical leadership of the project. I created reusable core components and assisted younger developers in implementing them within the application.
	I created the proof of concept for a Conda investment platform, built with Nuxt and Strapi, featuring Keycloak authentication and a Laravel/PHP backend.
	I also made the proof of concept with React/NextJS and Builder with custom components.
	I was also responsible for supporting an existing investment platform built with WordPress plugins, Vue3 and Laravel/PHP.
2022-06 – 2023-01	**iRonin.IT**
	Project: MeTime
	Role: Senior Frontend Developer
	Stack: Vue.js, React/NextJS
	Achievements:
	I was responsible for finishing a medical web application. The client brought to us an unfinished web application without any technical documentation. I successfully refactored core features, improved performance and added new features.
2021-10 - 2022-06	**Knowit**

	Project: Easy Software – MyEasy Portal **Role: Senior Frontend Developer** **Stack:** Vue.js, Nuxt, Web Components (Lit Element), Keycloak **Achievements:** I've prepared the administration panel app refactoring plan, including an automated test. I took technical leadership and supported other team members with the implementation. I've installed and configured the Cypress e2e test framework and started covering the app with tests.
2020-08 - 2021-06	**HTD Health**
	Projects: 1up Health **Role: Senior Frontend Developer** **Stack:** React, NextJS, Builder, NodeJS, AWS (Elastic Beanstalk), Docker **Achievements:** I finished the existing health business company website made with React/NextJS. I've upgraded the application from NextJS 7 to NextJS 10. I refactored core features and finally deployed the application to AWS Elastic Beanstalk. **Project: Boston Children's Hospital COVID evidence application** **Role: Senior Frontend Developer, Fullstack (PHP)** **Stack:** AngularJS, React, PHP **Achievements:** I was responsible for refreshing the old medical application. I successfully refactored AngularJS legacy code and developed an AngularJS/React hybrid app using UI-Router react-hybrid. I also refactored a lot of legacy PHP code. **Project: Rise Above Covid:**

Role: Senior Frontend Developer

Stack: React, Material UI, Lottie, Gatsby, Strapi

Achievements:

I was a key member of the development team responsible for creating the COVID website using React, Gatsby and Strapi. We worked under time pressure. I took technical leadership and developed the most difficult features. I supported younger developers.

2020-01 - 2020-08	**JASTRZAB MEDIA PRESS Sp. z o.o.**

Role: React Native Developer

Stack: React Native, Redux, SQLite Storage, Android Studio, Xcode, WordPress REST API

Achievements:

- Loading and presenting data from WordPress REST API
- Displaying rich media, like embedded Twitter, Instagram and Facebook posts, Youtube videos, etc.
- Background fetch for new posts and pushing remote notifications
- Storing user settings with SQLite Storage

2017-11 - 2020-07	**ITSG Global**

Project: Starfish CRM
Role: Senior Frontend Developer
Stack: Angular 8, PrimeNG, Angular CLI, TypeScript, ngrx

Achievements:

- The app performance improvements
- Code refactoring and bug fixing

Project: Rydoo
Role: Frontend Developer
Stack: Angular 7, Angular CLI, AngularJS, TypeScript, Javascript, HTML, SASS, LESS, GIT (Git Lab, Azure)
Achievements:

	• The app performance improvements
	• Code refactoring and bug fixing
	• Successful rebranding
2017-04 - 2017-10	**Howgorithm, Inc.**
	Role: <u>Frontend Developer</u> **Stack:** Angular 4, Angular CLI, TypeScript, Javascript, JointJS, SVG, Canvas, Bootstrap, HTML, CSS (SASS / Compass) **Achievements:** • Code refactoring and bug fixing • Developing new features • Preparing the app for the launch
2016.06 – 2017.06	**Zepter IT**
	Role: Web Application Developer **Stack:** Kentico CMS, Javascript, jQuery, Bootstrap, HTML, CSS (SASS / Compass), .NET **Achievements:** • Many improvements of existing websites. • Creating RWD versions of existing sites. • Building fresh new websites using Kentico CMS. • Cooperation with .NET developers. • Bug fixing.
2010-10 - 2016-05	**Getin Noble Bank S.A.**
	Role: **Web Developer / Team Leader** **Stack:** Adobe Flash, Action Script (2/3), HTML, (CSS / LESS / Compass), Javascript, jQuery, PHP, Silverstripe CMS **Achievements:** As a contact person between the Marketing Department and IT Department, I've helped improve the planning and developing process of new sites and web applications. I represented the Bank before media communications agencies and web advertisement publishers, including Google as a tech expert.
2003-08 - 2010-08	**Freelancer**
	Role: Flash Developer

	Stack: Adobe Flash, Action Script (2/3)
	Achievements:
	Creating Flash games, websites, and advertisements for polish and international companies, including:
	• Betsson.com
	• VARION GmbH
	• Lemon Foundation,
	• Comarch S.A.

Education

2000 - 2003	Pultusk Academy of Humanities, Institute of Marketing and Advertisement
1997 - 2000	Warsaw University of Economics and Computer Science

Languages

English	Advanced
Spanish	Basic
Polish	Native

Summary

I'm an experienced Senior Frontend Developer. I live in Warsaw and have worked as a Web Developer and Team Leader at the large Polish bank GNB. Currently, I work remotely.

I have a profound knowledge of Frontend architecture and technologies. I used all major frontend frameworks: Angular (1 and 2+), React and Vue. I'm familiar with server-side rendering tools like NextJS or Nuxt. I also have experience in DevOps, primarily with AWS.

In my free time, I play guitar and compose music. You can read more about my hobby here: http://stepniewski.art.
